

# PARTNERSHIP ANNOUNCEMENT

## REPRESENTING SAGE

Weidner is excited to announce our partnership with Sage Metering

Sage Metering is an innovative manufacturer of high-performance natural gas flow meters for gas flow measurement. The company has brought to market the first thermal mass flow meter to utilize graphical displays, a hybrid digitally driven circuit, and the industry's first in-situ calibration verification system.

Sage Metering is a premium source for monitoring and controlling the gas mass flow for manufacturing processes, building management systems, and various environmental applications. High-performance NIST-traceable thermal mass flow meters help increase productivity, reduce energy costs, maximize product yields, and tackle ecological applications.

### Thermal Mass

Sage Prime® is our flagship brand gas thermal mass flow meter preferred by our Industrial, Environmental and Commercial customers for many gas flow applications. It is packaged in a robust, yet lightweight, dual-sided NEMA 4 enclosure, is CE compliant, and meets UL and CSA standards for hazardous service. Easy access to a separate rear compartment with large, well-marked terminals provide ease of customer wiring.

### Sage Paramount

The Sage Paramount™ is our newest industrial thermal mass flow meter, including state-of-the-art components, a NEMA 4X enclosure, a fast response to rapid temperature fluctuations, and a well-thought-out terminal arrangement with a 3-way switch for externally, internally, or isolating the 4–20 mA. All Paramount orders include the free SageCom™ software, which provides the ability to reconfigure your meter settings (including changing the gas mix) and to run three performance validation checks followed by a printed report.
